Acetone as a yardstick for ketosis, 291
  bodies in urine, Rothera test for, modification, 908
  test, Lange, modification of, 1217
Acetonuria, value of, as diagnostic test in pregnancy, 214 (Abst.)
Acetyl-salicylic acid analgesia, clinical comparison, with and without magnesium oxide, 1064
Achylia, neutral red test, 217 (Abst.)
Acid fuchsin in Russell's triple sugar medium, use of, 533 (Abst.)
  lactic, gastric responses to, 141
    in blood, determination of, 60
    phosphomolybdic, reduction of, by monomethyl-paramidophenol, 495
    soluble organic phosphorus in blood, 250
    phosphorus in blood, 249
Acid-fast bacillus, cultivation of, in leprosy, 533 (Abst.)
  organisms, microscopic diagnosis of, 421
  quality of blastocystis hominis, 59
Acidity, gastric, combined test for, 932 (Abst.)
Acids, standardization of, 993
Adrenalin in blood, detection of, 1142 (Abst.)
Agar media, 1219
Agglutination test, rapid tularemia, 1233 (Abst.)
Albumin in cerebrospinal fluid, estimation of, 431 (Abst.)
Alcohol in blood, determination, 531 (Abst.)
Alcoholism, chemical proof of drunkenness and its intensity, 530 (Abst.)
Alimentary anaphylaxis, 1145 (B. Rev.)
  tract, absorption from, decreased, following injection of posterior pituitary extract, 843
    of man, studies in, 141
Alkalies, standardization of, 993
Allergen proof chambers, clinical treatment of asthmatic patients in, 442
Allergy, clinical, 1145 (B. Rev.)
Alpha-butyloxy-cinchoninic acid diethyl-ethylene-diamide hydrochloride, toxicity of, 447
Ameba, culture of, 321 (Abst.)
  preservation of, 320 (Abst.)
Amytal anesthesia, some effects of, 354
Anaerobic culture dish, an improved, 203
Anaphylaxis, alimentary, 1145 (B. Rev.)
  comparison of methods used in study of, 1069
  fatal, in man, 372
Anemia, pernicious, hemoglobin content, volume and thickness of red blood corpuscles in, and changes associated with liver therapy, 1026 (Abst.)
    maintenance dose of potent material, 1141 (Abst.)
    neutral red test in, 635 (Abst.)
    glucose tolerance in, 557
  red blood cell size in, 528 (Abst.)
    determination of, 1234 (Abst.)
  secondary, iron in treatment of, 858
  sickle cell, 637
Anesthesia, acetyl-salicylic acid analgesia with and without magnesium oxide, clinical comparison, 1064
  alpha-butyloxy-cinchoninic acid diethyl-ethylene-diamide hydrochloride, toxicity of, 447
  amytal, some effects of, 354
  in animals, Meltzer apparatus for, a modified, 74
  in diabetes, 787
  nupercaine, toxicity of, 447
  oxygen concentration, low, certain effects of, on, 881
  pentobarbital sodium, action of, 1056
  sodium ethyl propyl-methyl-carbinyl barbiturate, action of, 1056
  iso-amyl-ethyl barbiturate, effect of repeated injections on various viscera, 561
  studies on, 881
Anesthetics, volatile, apparatus for administering, intratracheally without tracheotomy, 87
Antibacterial properties of pyridium, 957
Antigen, a more sensitive, for Wassermann test, 1028 (Abst.)
  emulsions for diagnostic and exclusion tests for syphilis 186
    for microscopic slide precipitation tests for syphilis, 1208
  guinea pig heart, technic for constant supply of, 619
  lipid, 1208
Anticlotting agents, influence of, on transplantation and growth of tumor tissue, 369
Antimony in medicine, 239
Antimony-antimony oxide electrode, determination of P_H of phosphate buffer solutions by means of, 411

Antiseptic, urinary, pyridium, 957
Antiseptics, determination of value of, 934 (Abst.)
Antitoxin, vibrion septique, standardization of, 967
Apparatus, economical cage and water pipette for feeding experiments with mice, 1119
for administering volatile anesthetics intratracheally without tracheotomy, 87
for controlling temperature of fluid during injection, 837
heart sound amplifier, 624
intravenous infusion, continuous, 897
injection, constant, into unrestrained animals, 901
mechanical staining, 408
Meltzer, for anesthesia in animals, a modified, 74
pipetting machine, new automatic, 522
slide comparator for P_H determinations, 1105
time marker, a new, 912
to facilitate preparation of fresh frozen sections, 312
Appendicitis, nuclear index in, 308
Schilling index in, 386
Arsphenamine, perivascular injections of, treatment of accidental 1019
Arteries, coronary, arteriosclerosis of, 1185
occlusion of both, with rupture of auricle, 1083
Arteriosclerosis of the coronary arteries, 1185
Arthritis, blood sedimentation in, prognostic value, 933 (Abst.)
rheumatoid, etiology of, 527 (Abst.)
Artificial sunlight and its therapeutic uses, 98 (Abst.)
Aschheim-Zondek pregnancy test, hydatidiform mole as cause of positive reaction in, 27
Asiatic cholera, studies in, 325
Asthma, bronchial, etiology and control, 1047
Asthmatic patients, clinical treatment of, in allergen proof chambers, 442
Atrophy of subcutaneous fat following repeated injections of insulin, 1191
Auricle, rupture of, occlusion of both coronary arteries with, 1083
Axillary abscesses, direct isolation of bacterium tularense from, 46

B

Bachman precipitin test, human trichinella spiralis infections and, 524 (Abst.)
Bacilli, tubercle, discovery of, by direct culture or guinea pig inoculation, 434
Bacillus, mustard, contamination of grouping sera with, 259
welchii, notes on, 1175
Bacteremia in throat infections, 528 (Abst.)
Bacteria, gram positive and gram negative, staining of, in tissues, 524 (Abst.)
intestinal, methods of obtaining, without contamination, 95 (Abst.)
Bacterial cultures, indol in, detection of, 208 (Abst.)
dyes, glycerin as adjuvant to, 1236 (Abst.)
Bactericidal reagents, testing efficacy of, 52
Bacteriologic diagnosis of pertussis, 1027 (Abst.)
problems of surgery, certain, 675
technic, 1040 (B. Rev.)
Bacteriology, determinative, 219, 1237 (B. Revs.)
Bacteriostatic reagents, testing efficacy of, 52
Bacterium tularense, direct isolation of, from axillary abscesses, 46
Ball test for syphilis, 1214
Bandaging, minor surgery and, 938 (B. Rev.)
Barbituric hypnotics, separation of, from urine, 930 (Abst.)
Barium sulphate, effect of, upon incidence of human intestinal protozoa, 39
Basal metabolic rate, percentile chart for computation of, from spirometer data, 415
Basophilia, punctate, demonstration by dark-field illumination, 1031 (Abst.)
Basophilic cells, differential staining of, new method of, 96 (Abst.)
granules in mastocytes, elective staining of, 635 (Abst.)
B. C. G. vaccine, present status of, 220
B. coli in water, comparison of Dominick-Lauter test for, with standard methods, 525 (Abst.)
Bence-Jones test for protein in urine, 575
Bile ducts, diseases of, 1038 (B. Rev.)
functional tests in surgical diagnosis and treatment of diseases of, 765
surgical diagnosis and treatment of diseases of, functional tests in, 765
salts, new test for, 429 (Abst.)
Bilirubin, estimation of, in differential diagnosis of cerebrovascular accidents, 218 (Abst.)
in urine, detection of, 1142 (Abst.)
serum and plasma, 1142 (Abst.)
Biologic material, determination of copper in, 49
Biopsy in treatment of malignancy, 692
Bioassays, 1237 (B. Rev.)
Blastocystis hominis, acid-fast quality of, 59
Blastomycosis, systemic, 124
Blood, acid soluble organic phosphorus in, 250
phosphorus in, 249
adrenalin in, detection of, 1142 (Abst.)
alcohol in, determination, 531 (Abst.)
cancer, distribution of phosphorus in, 253
chemical analysis in general and urologic surgery, 751
detection of, according to Segeloff, 1232 (Abst.)
chemistry and the gastrointestinal tract, 760
cholesterol, in whole, determination of, 909
clotting time of, graphic method for measuring, 505
count, differential, in infancy, 207 (Abst.)
in the rabbit, the normal, 82

Blood—Cont'd
counts, cleaning of glassware, 218 (Abst.)
coverslip holder, a useful, 314
culture in tuberculosis, 215 (Abst.)
cultures, efficiency of, 169
derivatives, heated, for cultivation of hemoglobinophilic organisms, 166
effect of amytal anesthesia on, 357
erythrocyte, size of, methods for determining, 976
ester phosphorus in, 250
grouping, rapid method of titrating, 1033 (Abst.)
Gunther-Greenberg method determining inorganic phosphorus, 503
heated, for cultivation of hemoglobinophilic organisms, 166
hemoglobin, Osgood-Haskins method, simplification of, 482
hydrogen-ion concentration of, in untreated cancer cases, and its relation to prognosis, 704
hypoxanthine in, quantitative test for determination of, 918
incompatible, transfusion of, without reaction, 259
inorganic phosphate in, 249
determination of, 60
Gunther-Greenberg method for determining, 503
lactic acid in, determination of, 60
lecithin phosphorus in, 250
leucocyte count, differential, in infancy, 207 (Abst.)
method for reporting and interpreting, 296
nuclear index for interpreting and recording, 300
"shift to the left" in differential, 300
lipin phosphorus in, 250
nonprotein nitrogen in, determination of, 183
normal, distribution of phosphorus in, 253
nuclear index of, and influence of age, 300
whole, phosphorus partition in, 247
nuclear index of normal, and influence of age, 300
oxalated venous, uniform system of hematologic methods for use with, 476
oxidase reaction, a simple, 429 (Abst.)
pathology in relation to surgery, 647
peroxidase stain, new, 319 (Abst.)
P_H of, determination of, colorimetric method of Hastings and Sendroy, 621
phosphorus analysis, 158
determination, monomethyl-paramidophenol in, 495
monomethyl-paramidophenol in determination, 495
partition in normal whole, 247
picture in infectious disease, 655
of Hodgkin's disease, 214 (Abst.)
plasma, cholesterol in, accurate method for determination, 1225
determination, 520
partition of, in parenchymatous diseases of liver, 633 (Abst.)

Blood—Cont'd
platelets, response of, to external stimuli, 1025 (Abst.)
plates, counting, indirect method, 424 (Abst.)
polymorphonuclear leucocytes, "shift to the left" and nuclear index of, 327
protein precipitants, comparative study, 594
proteins, determination, micro Kjeldahl method, 500
pressure in infancy and childhood, 633 (Abst.)
readings in dogs, indirect, 597
red cell size in anemia, 528 (Abst.)
cells, determination of sedimentation rate of, in health and disease, rapid method, 487
sedimentation in arthritis, prognostic value, 933 (Abst.)
serum albumin and serum globulin content of, in syphilis, 952
calcium in, micromethod for, 215 (Abst.)
cholesterol in, accurate method for determination, 1225
in syphilis, viscosity of, 952
simultaneous determination of inorganic phosphate, sugar and lactic acid in, 60
sugar, effect of amytal anesthesia on, 355
determination of, 60
picric acid method, after zinc precipitation, 890
transfusion, donors, low-titered universal, use of, for patients of other blood groups, 670
fatal post-transfusion reactions, 216 (Abst.)
incompatible blood without reaction, 259
low-titered universal donors, use of, for patients of other blood groups, 670
urea nitrogen, determination by direct nesslerization, 1035
whole, cholesterol in, determination of, 909
normal, phosphorus partition in, 247
xanthine in, quantitative test for determination of, 918
Blood-grouping sera, slide method of titrating, 405
staining of, for preservation and identification, 1123
B. morganii No. 1, culture of, isolated from a parrot, 396
Bodily changes in pain, hunger, fear and rage, 99 (B. Rev.)
Boltz test in urinalysis, 426 (Abst.)
Bones and joints, surgery of, laboratory aids in, 795
Book reviews, 98, 219, 324, 432, 936, 1038, 1144, 1237

Burned skin, alleged toxin of, 823

C

Cage and water pipette for feeding experiments with mice, 1119
Cajol photographic method, decolorizing tissue preparations impregnated by, 935 (Abst.)
Calcium, micromethod for, 215 (Abst.)
precipitating substances, effect of, on ciliated epithelium of maxillary sinus, 341
Campiodol in roentgenography, 943
Cancer blood, distribution of phosphorus in, 253
cases, untreated, hydrogen-ion concentration of blood in, and its relation to prognosis, 704
hydrogen-ion concentration of blood in, in relation to prognosis, 704
laboratory and, 713
of breast, 100 (B. Rev.)
prognosis of, 1239
Carbohydrate metabolism in hypertension, 1141 (Abst.)
Carbon dioxide, solid, use of, in freezing tissues for microtome sectioning, 627
Cardiac rhythm, disturbances of, due to strophanthin, 12
Cardioid dark-field condenser, method of centering, 80
Cerebrospinal fluid, albumin in, estimation of, 430 (Abst.)
in premature infants, 429 (Abst.)
protein in, quantitative estimation of total, 999
simple method for estimating total precipitable, 1090
Cerebrovascular accidents, estimation of bilirubin in the differential diagnosis of, 218 (Abst.)
Chemical analysis of blood in general and urologic surgery, 751
detection of blood, according to Segeloff, 1232 (Abst.)
methods in clinical medicine, 1041 (B. Rev.)
proof of drunkenness, 530 (Abst.)
test for pyrogen in distilled waters for intravenous injections, 289
Chemistry and application of campiodol in roentgenography, 943
blood and the gastrointestinal tract, 760
physiological, introduction to, 937 (B. Rev.)
Chemotherapeusis, specific, testing efficacy of bactericidal and bacteriostatic reagents for use in, 52
Chemotherapy, rôle of buffers in, 131
Chest, sound transmission in, percussion bell for studying, 617
Chick embryo hearts, electrocardiographic studies on, 1194, 1198
Chloroform, recovering from brain, lungs, liver, 1033 (Abst.)
Cholera, Asiatic, studies in, 325
Cholesterin content of antigen emulsions, 1209
Cholesterol in blood plasma, determination of, 520
serum, accurate method for determination, 1225
in serum, determination of, 520
in whole blood, determination of, 909
Ciliated epithelium of maxillary sinus, effect of calcium precipitating substances on, 341
Circulation, effect of amytal anesthesia on, 356
Clinic and laboratory, relation of, 739
Clinical allergy, 1145 (B. Rev.)
hemoglobinometry, 1012
laboratory as an aid to surgeon, 641
as an aid to surgery (Symposium), 641, 743
medicine, chemical methods in, 1041 (B. Rev.)
pathologist, forty years as a, 743
treatment asthmatic patients in allergen proof chambers, 442
Clinicopathologic study of arteriosclerosis of coronary arteries, 1185
Clotting time of blood, graphic method for measuring, 505
Colon, ascending, and cecum, localized leucosarcomatosis of, 567
Colorimeter, clinical, Peebles-Lewis, two improved designs of the, 914
Colorimetric method of Hastings and Sendroy, some refinements upon, 621
Complement, drying from frozen state, method of, 1032 (Abst.)
fixation, efficiency of blood cultures, new method based on, 169
Condenser, cardioid dark-field, method of centering, 80
glass, a new high efficiency, 89
Congo-red test, excretion of dye in urine, 262
Copper, determination of, in biologic material, 49
sulphate tellurite medium for isolation of diphtheria, 211 (Abst.)
Coprophagy, dog muzzle designed to prevent, 1223
Coronary arteries, arteriosclerosis of, 1185
occlusion of both, with rupture of auricle, 1083
Count, leucocyte, 212 (Abst.)
method for reporting and interpreting, 296
nuclear index for interpreting and recording, 300
polymorphonuclear neutrophil, normal filament and non-filament, 212 (Abst.)
preparations, reticulocyte, improved technic, 1224
Counting blood plates, indirect method, 424 (Abst.)

Coverslip holder, a useful, 314
Creatinuria in tuberculosis, 5
Cultivation of acid-fast bacillus in leprosy, 533 (Abst.)
of entamoeba histolytica, recent improvement, 426 (Abst.)
of hemoflagellates, 427 (Abst.)
Culture, blood, in tuberculosis, 215 (Abst.)
dish, anaerobic, an improved, 203
flask, a new, 315
media, simple method for indicating carbohydrate series, 322 (Abst.)
medium, cystine, sterilization of, under steam pressure, 294
of ameba, 321 (Abst.)
of B. morganii No. 1 isolated from parrot, 396
Cultures, bacterial, indol in, 208 (Abst.)
blood, efficiency of, 169
Petri dish, direct contact printing of, method for, 212 (Abst.)
Cystine culture medium, sterilization of, under steam pressure, 294

D

Dark-field illumination, demonstration of basophilia by, 1031 (Abst.)
Decalcification of tissue, new method, 211 (Abst.)
Defecation center, medullary, 225
studies on, 225
Depancreatized dogs, influence of yeast on protein metabolism in, 1151
Dextrose tolerance, modification of, as index of metabolic activity of liver, 211 (Abst.)
Diathermy electrodes, surface heating with, 271
Diabetes, anesthesia in, 787
mellitus, pathology of, 324 (B. Rev.)
review of 1073 cases, 526 (Abst.)
surgery in presence of, 775
Digitalis, tinctures of, assay of, 850
Diphtheria, copper sulphate tellurite medium for isolation of, 211 (Abst.)
immunization, percutaneous method of, 632 (Abst.)
modified Loeffler blood serum medium, 1025 (Abst.)
Dog muzzle designed to prevent coprophagy, 1223
Dominick-Lauter test for B. coli in water comparison of, with standard methods, 525 (Abst.)
Donors, low-titered universal, use of, for patients of other blood groups, 670
Dry ice, frozen sections prepared by use of, 1027 (Abst.)
use of, in freezing tissues for microtome sectioning, 627
Duodenal contents, pancreatic ferments in, clinical method for quantitative determination of, 460
Dust-shield on still for intravenous solutions, 422
Dye, congo-red, excretion of, in urine, 262
excretion of, in urine, 262
Dyes, bacterial, glycerin as adjuvant to, 1236 (Abst.)
differentiation of various types of fats by means of, 926
Dysentery, Sonne type, study of, 528 (Abst.)
type of, new method of identification, 429 (Abst.)

E

Eberthella alkalescens, pyelonephritis of pregnancy due to, 437
Education, on public, 104
Electrical changes in isolated chick embryo hearts, technic of recording, 1194
device for grinding tissue under aseptic conditions, 64
Electricity, removal of serum protein by, 1087
Electrocardiographic studies on chick embryo hearts, 1194, 1198
Electrode, antimony-antimony oxide, determination of P_H of phosphate buffer solutions by means of, 411
Electrodes, diathermy, surface heating with, 271
Electrometric titration of uric acid, 1101
Embolism, thrombosis and, 107
Embryohormonic relations of suprarenal cortex to mesothelial tissues, 118
Emulsions, antigen, for diagnostic and exclusion tests for syphilis, 186
